PUJAN BANIK ARNAB

Industrial & Production Engineer

banikarnab.ipe@gmail.com | +880 1792 514506 | Jigatola, Dhanmondi, Dhaka, Bangladesh

LinkedIn: linkedin.com/in/pujan-banik-arnab

PROFESSIONAL SUMMARY

Results-driven Supply Chain and Production professional with experience across procurement, logistics coordination, and manufacturing operations. Currently serving as Junior Executive in Supply Chain Management at Excellent Ceramics Group, managing sourcing, international procurement, and shipment execution — from Comparative Statements and purchase orders to Letter of Credit processing, customs clearance, and freight coordination. Previously Assistant Engineer — Production at PRAN Beverage Ltd (PRAN-RFL Group), supervising beverage lines with GMP-compliant, safety-first practice. Skilled in cost optimization, inventory planning, and operational efficiency. B.Sc. in Industrial & Production Engineering (AUST). Preparing for graduate study (M.Sc.) in Supply Chain Management.

CORE SKILLS

- Procurement & Sourcing (Local & International)
- Vendor & Supplier Management
- LC Processing & Trade Documentation
- Logistics & Shipment Coordination
- Inventory & Stock Control
- Cost & Freight Optimization
- Production Operations & Line Supervision
- Process & Operational Improvement

PROFESSIONAL EXPERIENCE

Junior Executive — Supply Chain Management

Excellent Ceramics Group | May 2025 – Present | Dhaka, Bangladesh

- Manage end-to-end procurement of local raw materials, sodium silicate, and press machine punches and moulds for the Tiles and Ceramics units — from quotation collection and Comparative Statement (CS) preparation to vendor selection and purchase orders.
- Source finished goods, seat covers, fittings, and accessories from overseas vendors; evaluate quotations, select suppliers, and prepare Letter of Credit (LC) applications in coordination with banks.
- Coordinate with Clearing & Forwarding (C&F) agents on customs duty and clearance; follow up on imports to ensure timely receipt at the factory.
- Negotiate freight quotations with forwarders, monitor Estimated Time of Departure (ETD) and Estimated Time of Arrival (ETA), and obtain freight certificates from banks to keep shipments on schedule.
- Process supplier, freight, and inbound shipment invoices through system posting, bill and payment requisitions, and payments (including Post-Dated Cheques), maintaining accurate supplier ledgers.
- Verify LC files for document completeness and hand them to the Accounts team for accurate import costing; prepare work orders for the Designer team and process the related bill requisitions and payments.
- Collaborate with factory, bank, Accounts, and logistics teams to ensure materials arrive on time with complete documentation.

Assistant Engineer — Production

PRAN Beverage Limited (PRAN-RFL Group) | April 2022 – May 2023 | Bangladesh

- Supervised and operated beverage production lines to ensure smooth and continuous manufacturing operations; supported production planning and scheduling to meet operational targets and deadlines.
- Implemented process improvements to enhance efficiency and minimize material wastage; coordinated with maintenance teams to ensure timely equipment servicing and reduce downtime.
- Prepared and analyzed production reports to monitor performance and support decision-making.
- Ensured compliance with GMP (Good Manufacturing Practices) and workplace safety standards; maintained consistent product quality by adhering to standard operating procedures and production guidelines.

EDUCATION

Bachelor of Science — Industrial & Production Engineering

Ahsanullah University of Science and Technology | 2017 – 2022 | CGPA: 2.95

Higher Secondary School Certificate (Science)

MC College, Sylhet | 2013 – 2015 | GPA: 5.00

CERTIFICATIONS

- Supply Chain Logistics — Coursera
- Supply Chain Operations — Coursera

PROJECT & RESEARCH EXPERIENCE

Thesis — Design of Experiments on Hardened-Steel Turning

Ahsanullah University of Science and Technology

- Investigated the effects of cutting parameters and machining environment on surface roughness and chip morphology in turning hardened high-carbon steel (52 HRC), using Design of Experiments (DOE).
- Measured and analyzed surface roughness to identify optimal machining parameters for improved surface finish; evaluated chip morphology under different machining conditions to understand material behavior and process efficiency.
- Applied statistical and analytical methods to determine the most effective machining environment and cutting conditions.

Multi-Material Crusher — Product Design Sessional

Ahsanullah University of Science and Technology

- Designed and developed a multi-material crusher incorporating a pneumatic mechanism to crush aluminum cans and plastic waste, improving waste-handling efficiency and supporting sustainable material processing.
- Prepared design concepts, technical specifications, and project documentation.
